### Sample injection for highest productivity and fastest return on investment

Thermo Scientific™ Vanquish™ HPLC and UHPLC System Split Samplers perfectly combine maximum injection precision by SmartInject technology with very high sample capacity. All fluidics are consequently optimized for the highest ruggedness and uptime, even under the toughest system pressure and eluent conditions. The innovative air stream cooling provides maximum sample integrity, even in challenging environments. The customizable gradient delay volume allows for incredibly easy method transfer. Tedious sample configuration is eliminated through automated barcode reading. Throughput and application flexibility can be doubled with two independent injections units using a Thermo Scientific™ Vanquish™ Duo UHPLC System for Dual LC.

- Thermo Scientific™ Vanquish™ Horizon (150 MPa) and Flex (100 MPa) UHPLC Systems – Split samplers for highest injection precision with small injection volume without any tradeoff on durability and robustness, biocompatible
- Thermo Scientific™ Vanquish™ Core HPLC System – Split samplers for highest injection precision for standard, routine and highly productive HPLC applications with widest gradient delay volume adjustment capabilities for easiest method transfer
